# Aleksandr Busygin

Full-Stack Developer

## Summary

Results-driven Full-Stack Developer with 3+ years of experience in building scalable web applications and microservices. Specialized in Go, PHP, React, and PostgreSQL. Proven track record of optimizing application performance by up to 35% and developing reliable REST APIs handling 50,000+ daily requests. Strong expertise in Docker, Linux, and Telegram bot integration.

## Experience

### Full-Stack Developer

Jul 2023 - May 2026

ООО «ГорСеть»

Tyumen, Russia

#### Frontend & Client-Side:

- Developed and maintained user interfaces for the subscriber client portal and internal CRM system using JavaScript (React), HTML5, and CSS3, serving 15,000+ active daily users.
- Optimized responsive layout and client-side scripts, reducing core page load times by 35% and improving mobile performance scores.

#### Backend & Microservices:

- Designed and supported REST APIs in PHP / Go to integrate the billing system with internal microservices, processing over 50,000+ daily API requests.
- Configured and optimized PostgreSQL queries and indexing, leveraging GORM to reduce database query execution time by 40% during peak traffic hours.
- Developed an internal Telegram bot in Go integrated with third-party APIs, automating status notifications for 20+ field engineers and reducing incident response time by 25%.

#### Infrastructure & Tooling:

- Set up application containerization using Docker, managed source control with Git, and operated within a Linux environment.

## Education
